

REMARKS

The applicant would like to acknowledge and thank the Examiner for the courtesy of a telephone interview granted in the parent application. To summarize, during the telephone interview, counsel for applicant presented a description of the foregoing amendment to claim 1. As recorded in the Interview Summary, to distinguish from the reference to Correa, the heat removal members are described as extending toward the outer wall of the combustor which also is recited in claim 1. The Examiner indicated that this would likely distinguish over this reference.

It is not believed that any of the other references of record add anything to the Correa patent in terms of the features now presented in the pending claims, and, accordingly, it is submitted that these claims should be entitled to favorable treatment.

Respectfully submitted,

W. Warren Taltavull
